Dear Sir:

Applicants thank Examiners Bullock and Singh for the telephonic interview of September 13, 2007 with the Applicants and Applicants' representatives. In the interview, claim 57 was discussed. Applicants discussed the use of the mixed metal oxide compounds in the sulfur reduction in gasolines as compared to that described in U.S. Patent No. 6,028,023 using hydrotalcite like compounds. Response to the Office Action, filed on September 10, 2007, was also discussed.

Respectfully submitted,
